

AltroFix™ SD70

One-Part acrylic adhesive for static sensitive areas

Features and benefits

- Installs in areas up to 90% RH
- Conductive adhesive — perfect for static sensitive areas
- Usable for both porous and non-porous installs.
- Contains Low VOCs
- Freeze-thaw stability: 5 cycles at 0° F
- Complies with SCAQMD Rule 1168

Applications

A ready-to-use one-part acrylic adhesive for both porous and non-porous applications. It is designed for use with Altro Walkway 20SD in static-sensitive environments like laboratories, cleanrooms, and machine shops.

Specifications

Coverage: 80 sq ft per gallon with 1/16" square notched trowel.

For installation instructions consult the Altro sheet flooring installation guide or adhesive label for full details.

Adhesive coverage is only an approximation based on experience, manufacturers recommendations, and subfloor texture and porosity, Altro does not warrant nor guarantee actual adhesive coverages.
