

Altro floors + walls in cannabis production facilities

Your business is to cultivate and produce medical or recreational marijuana and cannabis products. Our business is to provide you with durable, hygienic interior finishes that will support your business.

We know that a safe, efficient and hygienic facility is a vital part of the production process, which is why Altro's specialize flooring and wall solutions are designed to handle everything thrown, dropped, or sprayed on them.

Having the right floor and wall system included in your facility's buildout won't necessarily enhance your yield but it can enhance your safety. Having the wrong floor or wall can be an unnecessary distraction that can negatively impact your business.

We are experts in manufacturing flooring and wall systems specifically designed to improve the facilities like yours. Altro's floor and wall systems are easy to clean, durable and moisture resistant, so they intrinsically protect vulnerable plants from microbes, fungi and insects.

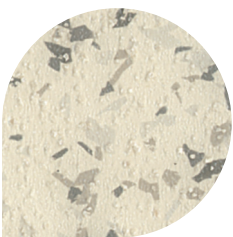

Our sheet flooring products offer varying degrees of slip resistance, allowing you to choose the floor of best fit for your facility and to ensure the area is safe for employees whether your company is growing, storing, extracting, or selling cannabis products.

Altro Whiterock and Altro Whiterock Chameleon wall panels make the perfect solution in any grow room or greenhouse – meeting pharmaceutical and cleanroom construction standards with its smooth, durable, hygienic and easy-to-clean surface. A non-shedding and low-VOC emitting product, Altro Whiterock meets ISO Class 2 or higher and higher cleanrooms.

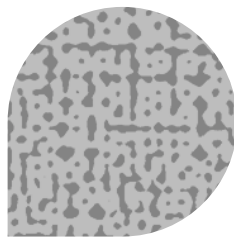

Why choose Altro?

- All Altro products are heat-weldable to seal off gaps and crevices, protecting the plants from microbes and fungi
- Altro products are made from vinyl and are tested and proven to resist the growth of mold
- Moisture resistance mitigates bacteria build-up and water damage and other harmful growths
- Competitive cost to other finishes traditionally used within cannabis industry
- Altro wall cladding is non-shedding and low-VOC emitting
- Altro products can withstand extreme point loads exceeding 2,000 psi to accommodate heavy equipment
- Altro Whiterock Chameleon, high gloss wall panels offer better light reflection
- Altro adhesive-free flooring options allow for great solutions to fast-track projects
- Altro flooring is sustainable and includes rapidly renewable bio-based content
