# Reduced cove former behind ligature resistant toilet

Detail for behavioral and mental healthcare facilities

updated 09/15/21

For Altro flooring to be successfully installed in behind floor and wall mounted ligature resistant toilets, the flooring must be done in a pencil cove application. It is recommended to have the cove former reduced 8"-10" on either side of the toilet.

Refer to the pencil cove detail diagram and reducing cove former detail diagram on [www.altro.com](http://www.altro.com) for more information.
