

IT'S TIME TO **REDISCOVER ALTRO**

THE BUSY COMMERCIAL KITCHEN AT EDGEWATER - LAKE WANAKA WAS DUE FOR AN UPDATE WHERE ALTRO K30 WAS THE ONLY SOLUTION.

Edgewater Lake Wanaka is a hotel, conference and wedding venue on the shores of the beautiful Lake Wanaka in Wanaka New Zealand. When they needed to refurbish and expand their busy Commercial Kitchen they wanted a flooring solution that was durable, easy to clean, attractive and safe. Altro Stronghold K30 came highly recommended by their Commercial Kitchen Appliance provider as the best Safety Flooring solution for them.

Water underfoot is treacherous enough – add grease, oils and fats, and you've got a dangerous environment. So, for commercial kitchens, canteens, food preparation and service areas, it's essential to select flooring that will help catering staff do their job safely.

Altro Stronghold™ 30 achieves Altro's highest rating for slip resistance (TRRL≥55, R12) and is designed to minimise risk in wet and greasy conditions for the lifetime of the flooring. As well as helping to keep staff safe from slips, it also helps reduce their fatigue, thanks to its 3mm thickness which provides noise reduction and comfort underfoot.

Altro Stronghold 30/K30™

“Our busy commercial kitchen needed a complete over-haul. The existing flooring had lost it’s non-slip properties and had become slippery. We were using rubber mats to assist with slip resistance but these were proving to be a trip hazard in themselves. We needed to remove the existing flooring and replace it with a long lasting, easy to clean and safe new flooring. Through a strong recommendation from our kitchen appliance supplier we chose Altro’s Stronghold K30 R12 Safety Flooring in colour Dolphin for our new kitchen. The result has been fantastic. The 3mm thickness of Stronghold K30 is not only proving to be extremely durable but it is much more comfortable and less fatiguing on our staff who are working on it all day. It is also proving to be extremely easy to clean and the lifetime slip resistance guarantee provides me with the assurance that my staff and suppliers will remain safe at all times. For these reasons, I would strongly recommend that you consider using Stronghold K30 on your commercial kitchen floors.”
