Spiritual Care of Ksyen Regional Hospital

A dose of modern design

Terrace, British Columbia, Canada

A newly expanded Ksyen Regional Hospital in British Columbia, Canada has been designed to meet the growing needs of its surrounding communities. The facility now includes more than 80 beds, many in private rooms, a larger emergency department with trauma bays, pediatric care areas, and four operating rooms, all supported by the latest diagnostic imaging technology.

HDR Architecture Associates Inc was tasked with creating a modern, welcoming environment that could balance clinical efficiency with patient comfort. To meet the demands of a modern healthcare environment, architects specified a range of Altro flooring and wall solutions carefully selected for performance, hygiene and design flexibility. Products used throughout the facility include Altro Aquarius, Altro Classic 25, Altro Walkway 20, Altro Whiterock, Altro Whiterock Chameleon, Altro Whiterock Shelf Insert, and Altro Puraguard.

Creating calm, patient-friendly spaces was a priority in the Spiritual Care of Ksyen Regional Hospital, where wall finishes like Altro Whiterock Chameleon add color and warmth to traditionally sterile environments, helping reduce patient anxiety and contributing to a more positive care experience. For areas requiring added storage functionality, Altro Whiterock Shelf Inserts deliver hygienic integration without compromising cleanability.

Durability is key in areas with heavy foot and wheeled traffic. Altro Classic 25 and Altro Walkway 20 provide robust, slip-resistant surfaces designed to withstand the wear of daily hospital operations while maintaining visual appeal. These products help ensure that critical corridors remain operational and easy to maintain with minimal downtime.

In wet environments such as patient bathrooms and clinical wash areas, Altro Aquarius offers reliable slip resistance under both shoe and barefoot conditions. This enhances safety for patients and staff alike, especially in areas with high moisture exposure.

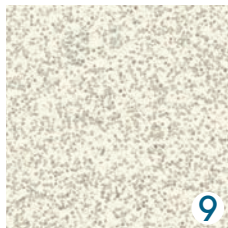

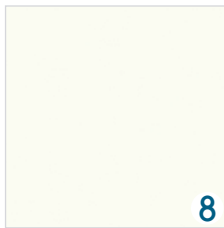

Additionally, in the showers within the behavioral mental health units, a pencil cove was used. The pencil cover installation method is an extremely secure way of detailing showers and wet areas. Altro Whiterock is flush against the flooring to ensure there is no opportunity to pick at the finishes. The bottom edge of the wall panel is chamfered and caulked with tamper-resistant security sealant.

Back-of-house and service zones benefit from Altro Puraguard, which provides impact resistance and chemical durability in a cleanable wall finish. This supports infection control while standing up to rigorous cleaning protocols.

Emergency units also benefit from environments that combine efficiency with comfort. Seamless flooring solutions like Altro Walkway 20 and Altro Classic 25 offer underfoot support and a homelike aesthetic, while their monolithic installation ensures thorough cleaning and disinfection.

Together, these integrated Altro solutions support a safer, more welcoming healthcare environment at Ksyen Regional Hospital, designed to meet both clinical demands and patient well-being.
