- 2. Altro Stronghold™ 30

Capability Barns

Altro kitchen system provides a perfect fit

Issue

Bannold are one of the UKs largest independent family run suppliers of natural hard landscaping materials. Based in Cambridgeshire, Bannold wanted to refurbish 1920 railway carriages to create a tea room for customers.

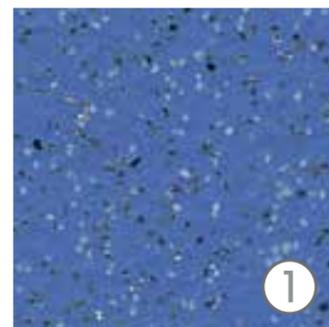

The Carriage Tea Room had a dated wooden substrate that needed to be replaced with a modern hygienic clinical finish for the kitchen facilities. The walls were not a square flat surface and needed a flexible product that could be fitted into the space. Floors and walls had to be easy to clean and maintain and fit into an environment without a straight line.

Approach

Cladpro are leading Altro Whiterock Premier installers specialising in hygienic wall finishes, floor coverings and ceilings. They suggested the Altro kitchen solution for the kitchen carriage. All the walls were thermoformed and wrapped to fit the unusual shape of the carriage.

Solution

Altro Stronghold 30 keeps staff safe, with Altro's highest slip-resistant rating of (PTV 55, R12) even with common kitchen contaminants such as grease, oil and flour. With 3mm comfort underfoot and 10dB impact sound insulation, it makes busy and noisy kitchen environments more comfortable for staff. Combined with Altro Whiterock it creates a full sealed solution to maintain the highest levels of safety and hygiene.

Looks great with:

1. Altro Classic™ 25
2. Altro Fortis Titanium™
3. Altro Whiterock hygienic doorsets™

Altro Whiterock White is the perfect, hygienic alternative to ceramic wall tiles, offering a proven, high performance option. Impact resistant, grout-free and easy to clean.

Altro Stronghold 30 and Altro Whiterock are Hazard Analysis and Critical Control Points (HACCP) approved making it particularly suitable for commercial kitchens.

Altro Stronghold 30 achieves Altro's highest rating for slip resistance and is designed to minimise risk in areas exposed to grease, oils and fats for the lifetime of the flooring. As well as helping to keep staff safe from slips, it also helps reduce their fatigue, thanks to its 3mm thickness which provides noise reduction and comfort underfoot.
