

Designed for possibilities.  
Made for people.

lightweight safety flooring for the transportation industry

## Emergency vehicle flooring

# Providing support to ambulances and patient transport vehicles

Altro transport floors are purposely engineered for vehicles operating in the most demanding environments. We understand that ambulances and patient transport vehicles need to be safe, quick and easy to clean, and lightweight, in order to allow them to focus on what matters most.

Altro is proud to offer durable, safe, naturally hygienic, and lightweight transport floors which are ideally suited for Type I and III ambulances, Type II basic patient transport, and similar vehicles. Without compromising on safety, hygiene, durability, or cleanability, the lightweight construction of our floors also allows for greater fuel economy.

All of our transport products have a minimum 10-year non-prorated warranty, meaning they will stand up to the heavy-duty wear demanded from the toughest operating conditions.

Specify Altro for safe, easy to clean, slip-resistant, hygienic, and lightweight solutions for your emergency fleet.

## Altro Transflor Heavy Duty Plus safety flooring for ambulances and emergency vehicles

### Superior safety and durability

Newly enhanced chip-free Altro Transflor Meta™, and chipped Altro Transflor Chroma™ safety floors are now 20% lighter and combine improved strength and durability with excellent sustained slip resistance for high performance, simplicity, and practicality.

All of our Heavy Duty Plus transport safety floors are designed to withstand the extreme conditions Type I, III, or similar emergency vehicles endure. Our hard wearing, lightweight floors put a premium on safety and protect your passengers and front line safety workers in both wet and dry conditions. Our floors achieve a SCoF value of .6 or greater using the James Test and a sustained PTV of  $\geq 36$  as a minimum, guaranteeing a less than a one in a million chance of a slip, even with the most diverse contaminants.

## Altro Transflor slip resistant flooring for patient transport vehicles

### Visually appealing, stain resistant, easy to clean

Altro Transflor Artis™ is a resilient mineral-inspired design slip resistant flooring with a quality, easy to clean finish, and comfort underfoot.

Cleaning downtime between calls is kept to a minimum with our flooring which features Easyclean™ technology that improves cleanability and stain resistance.

Altro Transflor Artis doesn't just look great, but offers PUR coating for protection against scuffs and stains, while also offering comfort underfoot. Choose Altro Transflor Artis for unrivaled performance and ease of maintenance, call after call.

## The next step in emergency and patient transport vehicle flooring

### Features and Benefits:

- **Occupant safety** - slip resistant even under wet conditions
- **Stain resistant** - resists staining of blood, iodine, Betadine, and many other liquids and chemicals
- **Hygienic** - does not encourage bacterial growth - non-porous, prevents chips and cracks which can trap bacteria
- **Easy to clean** - Increase number of daily service calls with our flooring which features Easyclean™ technology that offers significant stain resistance plus faster cleaning
- **Durable** - increased scratch resistance - increased tensile and elongation strength
- **Seamless installation** - 79 inch width allows for an easy, one sheet installation
- **Waterproof barrier** - provides protection from water and bacteria ingress
- **Bio-based content** - these products do not contain phthalates and contain rapidly renewable, bio-based ingredients
