## Grow Facility Pemberton

### New facility gets hygienic wall protection upgrade

Pemberton, British Columbia, Canada

A Growing Facility in Pemberton, British Columbia of 6500 square feet was in need of medical-grade wall protection to bring this facility up to the stringent work specifications required. Not familiar with the type of wall products that would suit their needs, for recommendations they contacted WallPro Systems and Erv Parent Group.

WallPro, an Elite Installer of Altro Whiterock helped to install PVC hygienic wall panels in the grow facility in Pemberton. The main reason for adding PVC hygienic walls was to improve the cleanliness of the warehouse and make it easier to maintain.

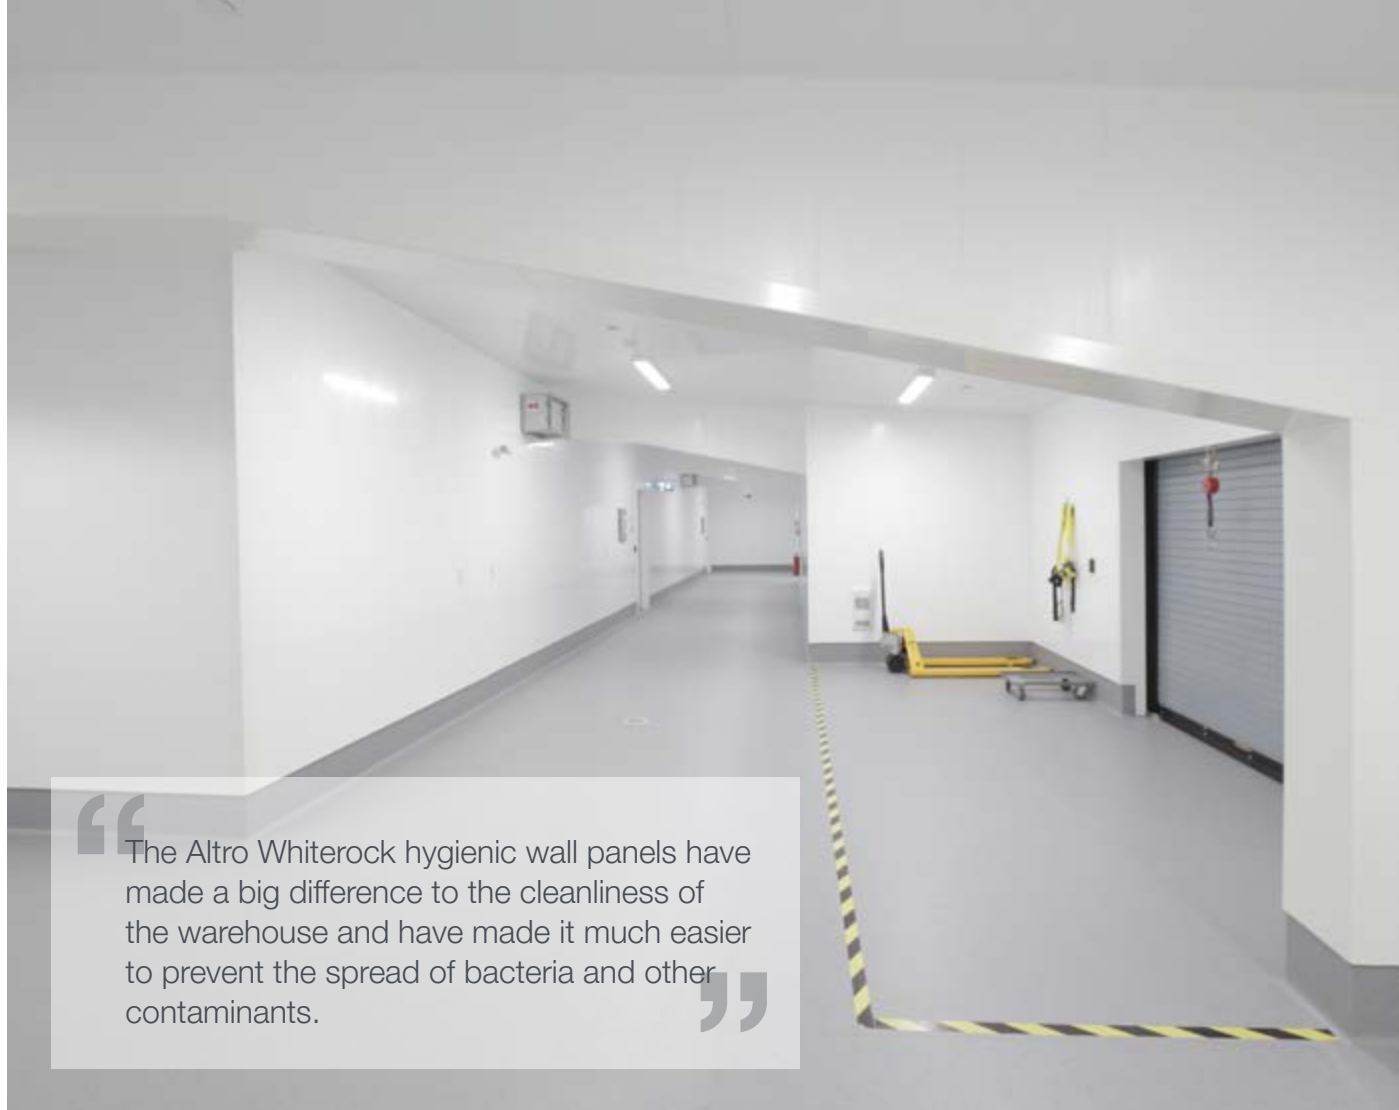

The WallPro team installed Altro Whiterock hygienic wall panels in the laboratories and PVC liner panels were used in the warehouse area. Altro hygienic wall panels are the premium standard for wall protection in grow facilities and provide a sterile environment that is easy to clean and maintain.

Altro Whiterock wall panels are an excellent choice for wall protection in high-traffic areas because they are extremely durable and easy to clean. They resist impact, scratches, and scuffs, which helps keep the warehouse looking new and clean.

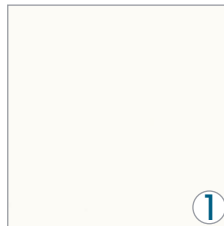

The facility was very happy with the complete transformation of their well-used, 6500 sq/ft facility's walled surfaces to their now state-of-the-art, protective, hygienic, and aesthetically pleasing new indoor growing environment.

**Installer: WallPro Systems**  
**Altro distributor: Erv Parent Group**
