New Hampshire Technical Institute

Residential hall bathroom space receives an Altro renovation

Concord, New Hampshire, USA

New Hampshire Technical Institute (NHTI), based in Concord, New Hampshire, is a dynamic public institution that provides an accessible, rigorous education for students, businesses and the community.

Langley Hall is one of the central hubs for student activity on campus and is home to many students. NHTI recognized the need for a significant upgrade to the bathroom and shower facilities in this dormitory, with a focus on creating a safer and more hygienic environment for its students.

Curtis Ryder, an Altro Whiterock Elite installer, and owner of C.J. Ryder Flooring LLC was selected to specify and install a wall cladding system that was both durable and hygienic, along with slip-resistant flooring that prevents slips and falls when wet.

Working closely with Altro Representatives, Ryder opted for Altro Whiterock and Altro Aquarius because he knew both solutions were specifically engineered to thrive in this environment.

Ryder chose to install 60 panels of Altro Whiterock throughout the bathroom and inside the showers because it is easy to clean, impact-resistant and provides a continuously smooth, stain-resistant, wipe-clean surface with no gaps or grout.

Another factor in the decision was that Altro Whiterock can be thermoformed around all inside and outside corners, eliminating the need for corner guards which prevents the need for accessory pieces that could potentially harbor bacteria.

Altro Aquarius was the ideal flooring choice for showers and bathroom areas because when water, shampoo and soap contaminants are present, it maintains slip resistance regardless of whether the student is barefoot or wearing shoes/flip flops.

Together Altro Whiterock and Altro Aquarius give these bathroom and shower facilities a polished, hygienic look with a fully integrated, water-resistant finish.

Specifier and Installer: C.J. Ryder Flooring LLC.
