Senior care facility upgrades with Altro adhesive-free floors

Perth, Australia

Amana living are a premium aged care service who provide their residents with first class facilities and care. The welfare of their residents is always their main priority. The community lounge at Moline Village, Karrinyup was ready for an upgrade. They had an existing vinyl plank floor that had been installed for many years and was in need of an update, however there were a few challenges they faced. They needed to ensure there was minimal disruption to the residents and staff while the installation took place, while requiring a quick turnaround period, with minimal noise, dust and unpleasant odors.

Altro Wood™ adhesive-free was chosen due to its fast installation process and for having no adhesive odors. As the facility was looking for a product that gave them minimal downtime and a fast installation, selecting Altro Wood™ adhesive-free was an obvious selection.

The key issues were solved by using Altro Wood™ adhesive-free, which reduced the total renovation time, and allowed Amana Living to reopen the area to residents within a faster period of time compared to traditional adhered floor.

“The installation was completed in a very timely manner with no take up of existing flooring, no dust or adhesive odors causing discomfort to anyone in the facility, all being completed with minimal disruptions. Altro Wood™ adhesive-free was a great solution to the issue of limited down time in an operating age care facility.”

“Everyone is delighted with the completed flooring which now delivers great safety underfoot, ease of cleaning and a fantastic looking renovation completed in record time.”
