# Altro digitally printed floors for bus

### **Altro Transflor Metris™ Custom**

#### **Application areas:**

• City buses, coaches, autonomous vehicles, light commuter buses, shuttle buses

#### Discover Altro Transflor Metris Custom for a difference that's clear.

- Encourage ridership with eye catching, high-resolution printed bus floors
- Stand up to the daily commute with robust, durable construction
- Soften engine noise with 15dB acoustic performance
- · Maximise fuel economy with the lightest weight acoustic floor for the transport market

For the first time in our bus and coach portfolio, Altro now offers customisable digitally printed floors. Altro Transflor Metris Custom gives you the broadest choice of standard designs in the transport industry, developed in collaboration with industry design experts, and each customisable into any colour you choose. Or, if you have something specific in mind, there is also the option to create your own completely custom design for your vehicle. All designs are printed using our in-house state of the art digital printing technology, meaning high-fidelity, great looking designs.

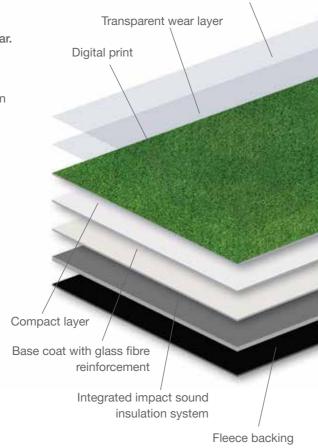

High quality surface finish

## **Product guide**

#### Make installation easier

Altro Transflor Metris Custom is available for use with all of our installation services: self-adhesive, pre-cut flooring, reverse welding and logos. In order to ensure the best quality finish and installation, please discuss any pre-cut flooring or reverse welding requirements with your sales consultant.

If logos are required as part of your design, these can be printed as part of a custom design or included as separate water-resistant laminated logos. Please contact your sales consultant to discuss your requirements.

Castor chair abrasion	EN 425	Yes, type W
Wear resistance	EN 660-2	Group T
Chemical resistance	EN ISO 26987	Good
Electrical behaviours	EN 1815	≤ 2 kV, antistatic

# **Endless possibilities with custom design**

Altro Transflor Metris Custom is available to order in your own custom design. To create an original design for your project, please get in contact with your local Altro Transport flooring consultant who will be able to take you through the process.

#### File requirements for custom design

Please ensure your custom design artwork meets the following requirements:

- Colour space: RGB
- Format: uncompressed JPG
- Resolution: we recommend a resolution of 300dpi
- File size: The size of your file (width and height), depends on your project, but there are some technical considerations. Please check how to prepare your file before you proceed.

The image resolution of the file should follow the file's requirement guidelines and the image should not have been enlarged from its original quality. This means that you cannot take a small image from the web and increase its dpi, as the result will be a heavily pixelated image that is not fit for print.

When specifying the amount of flooring needed for your installation, please allow extra to ensure you can match the design between flooring cuts.

To get started, contact your local Altro Transport sales consultant who will be able to guide you through the process.

### **Samples**

If colour choice is critical, please request a sample of the material
