

# Altro floors + walls in cannabis production facilities

Your business is to cultivate the growth of medical or recreational marijuana. Our business is to provide you with durable, hygienic interior finishes that will support your business.

We know that a safe, efficient and hygienic facility is a vital part of the production process, which is why Altro's specialist flooring and wall solutions are designed to handle everything thrown at or dropped on them.

Having the right floor and wall system won't necessarily enhance your yield but it can enhance your safety. Having the wrong floor or wall can be an unnecessary distraction that can negatively impact your business.

We are experts in manufacturing high-performance flooring and wall systems specifically designed to improve the facilities like yours. Altro's floor and wall systems are easy to clean, durable and moisture resistant, and protect vulnerable plants from microbes, fungi and insects by sealing off the gaps and crevices where these dangers can hide.

Our sheet flooring products offer varying degrees of slip resistance, allowing you to choose the floor of best fit for your facility and to ensure the area is safe for employees tending to the plants, monitoring plant development, and harvesting the buds.

Altro Whiterock and Altro Whiterock Chameleon wall panels make the perfect solution in any lab or cleanroom – meeting pharmaceutical and cleanroom construction standards with its smooth, durable, hygienic and easy-to-clean surface. A non-shedding and low-VOC emitting product, Altro Whiterock meets ISO Class 2 or higher and higher cleanrooms.

## Why choose Altro?

- All Altro products are heat-weldable to seal off gaps and crevices, protecting the plants from microbes and fungi
- Moisture resistance mitigates bacteria build-up and water damage
- Our durable floors and walls reduce the risk of dings and punctures
- Altro Whiterock is non-shedding and low-VOC emitting
- Altro products are easy to clean
- Altro Whiterock Chameleon, high gloss wall panels offer better light reflection
