Altro safety flooring for new-built school

Altro Walkway™ 20, Altro Stronghold™ 30

When Lightmoor Village Primary School opened its doors for the very first time, excited pupils walked, ran and skipped along to join new classmates.

The school, newly built as part of a £3.5 million school and housing development project in Telford, welcomed 210 pupils to its modern building consisting of seven class rooms, social play areas, multi-use games area and school hall.

Altro, the leading manufacturer of safety flooring, supplied a variety of flooring products all offering excellent slip resistance, for the school's classrooms, shower and kitchen areas.

In the classrooms Altro Walkway 20 was installed. It offers excellent durability and has high impact resistance, making it ideal for coping with the wear and tear of pupils and the movement of desks and chairs. It also benefits from Altro Easyclean™ Technology making it easier to clean and ensuring it stays looking its best for longer.

Within the kitchen the likelihood of grease, fats or oils is greater and the need for hygiene is paramount, therefore Altro Stronghold 30 was specified as the flooring solution. The 3mm thick safety flooring is comfortable to walk on and combines excellent underfoot security with long-term durability and ease of cleaning.

With hundreds of children pounding the floor every day, slip resistance, durability, cleanability and aesthetics were key to this modern, new-build school. Altro's products are tried and tested and do exactly what they say. We've specified Altro before and will continue to specify them in future projects too.

Bob Hesketh, Project Designer from Telford and Wrekin Council

We've installed hundreds of metres of Altro's products over the years and as ever the installation went very well. Altro don't just provide the products suitable to the various applications, but they provide excellent service and delivery too.

Brian Wells, Contract Manager at Commercial Flooring
