Warm tones and clean lines
for bathroom

“Our installer commented on how little waste or preparation time there was, and how pleased he was to not have to move heavy boxes of tiles.”

Helen Green,
Homeowner

Hartington Place, Letchworth

Warm tones and clean lines
for bathroom

Issue

A 15-year-old bathroom in a housing development was looking tired and dated and the owner wanted to refresh the area with minimal disruption in a quick timescale. The bathroom had three walls of ceramic tiles, and a sink splashback, which were in good condition but were unfashionable and required high levels of maintenance to remove limescale and mould.

The property, a first floor flat, had easy access but no lift, so equipment, materials and any waste needed to be carried up and down the stairs.

Approach

“We wanted to replace the ceramic tiles, without having to re-plaster the bathroom walls which would mean a complete renovation and redecoration project,” said Helen Green, the owner. “We live in an area with hard water and limescale is a real problem so a wall that is easy to keep clean would be ideal.”

Solution

After liaising with Altro customer services, the new Altro Walls ShowerKit was recommended as being the ideal solution as the wall panels can be installed over existing ceramic tiles and provides ease of maintenance for residents. There is also no requirement for construction materials or heavy equipment as Altro Walls ShowerKit is lighter to transport than ceramic tiles.
