

## General office spaces

Blues, greens and grays are the go-to for creating a calm and welcoming work environment. Pairing them with a stimulating color such as red or orange can help to add a bit of flavor that will inspire productivity and energy among your staff.

## Reception areas

Soft and muted colors are recommended for these areas as they help to create a warm and welcoming environment in what will often be the first point of contact between your company and a client. You can choose blues and greens with a splash of other tones to fit your company's energy.

## Front-of-house restaurant areas

Reds and browns are known for increasing appetite in food service areas. Consider a rich wood or warm red pattern to liven up your dining areas and create an environment that will entice guests to come back for more.
