Nyborg Strand Hotel and Conference Centre, Denmark

From slippery tiles to a slip-resistant kitchen floor

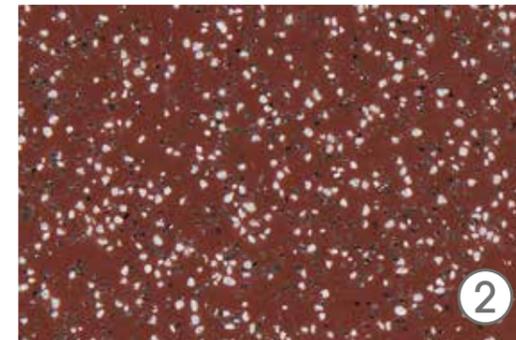

“With the Altro floor, we haven’t experienced a slip – even with water or oil. It’s a huge difference from before, when we often slipped on the smooth tiles.”

Kasper Marcher Asmussen,
Head Chef, Nyborg Strand

Nyborg Strand Hotel and Conference Centre, Denmark

From slippery tiles to a slip-resistant kitchen floor

Issue

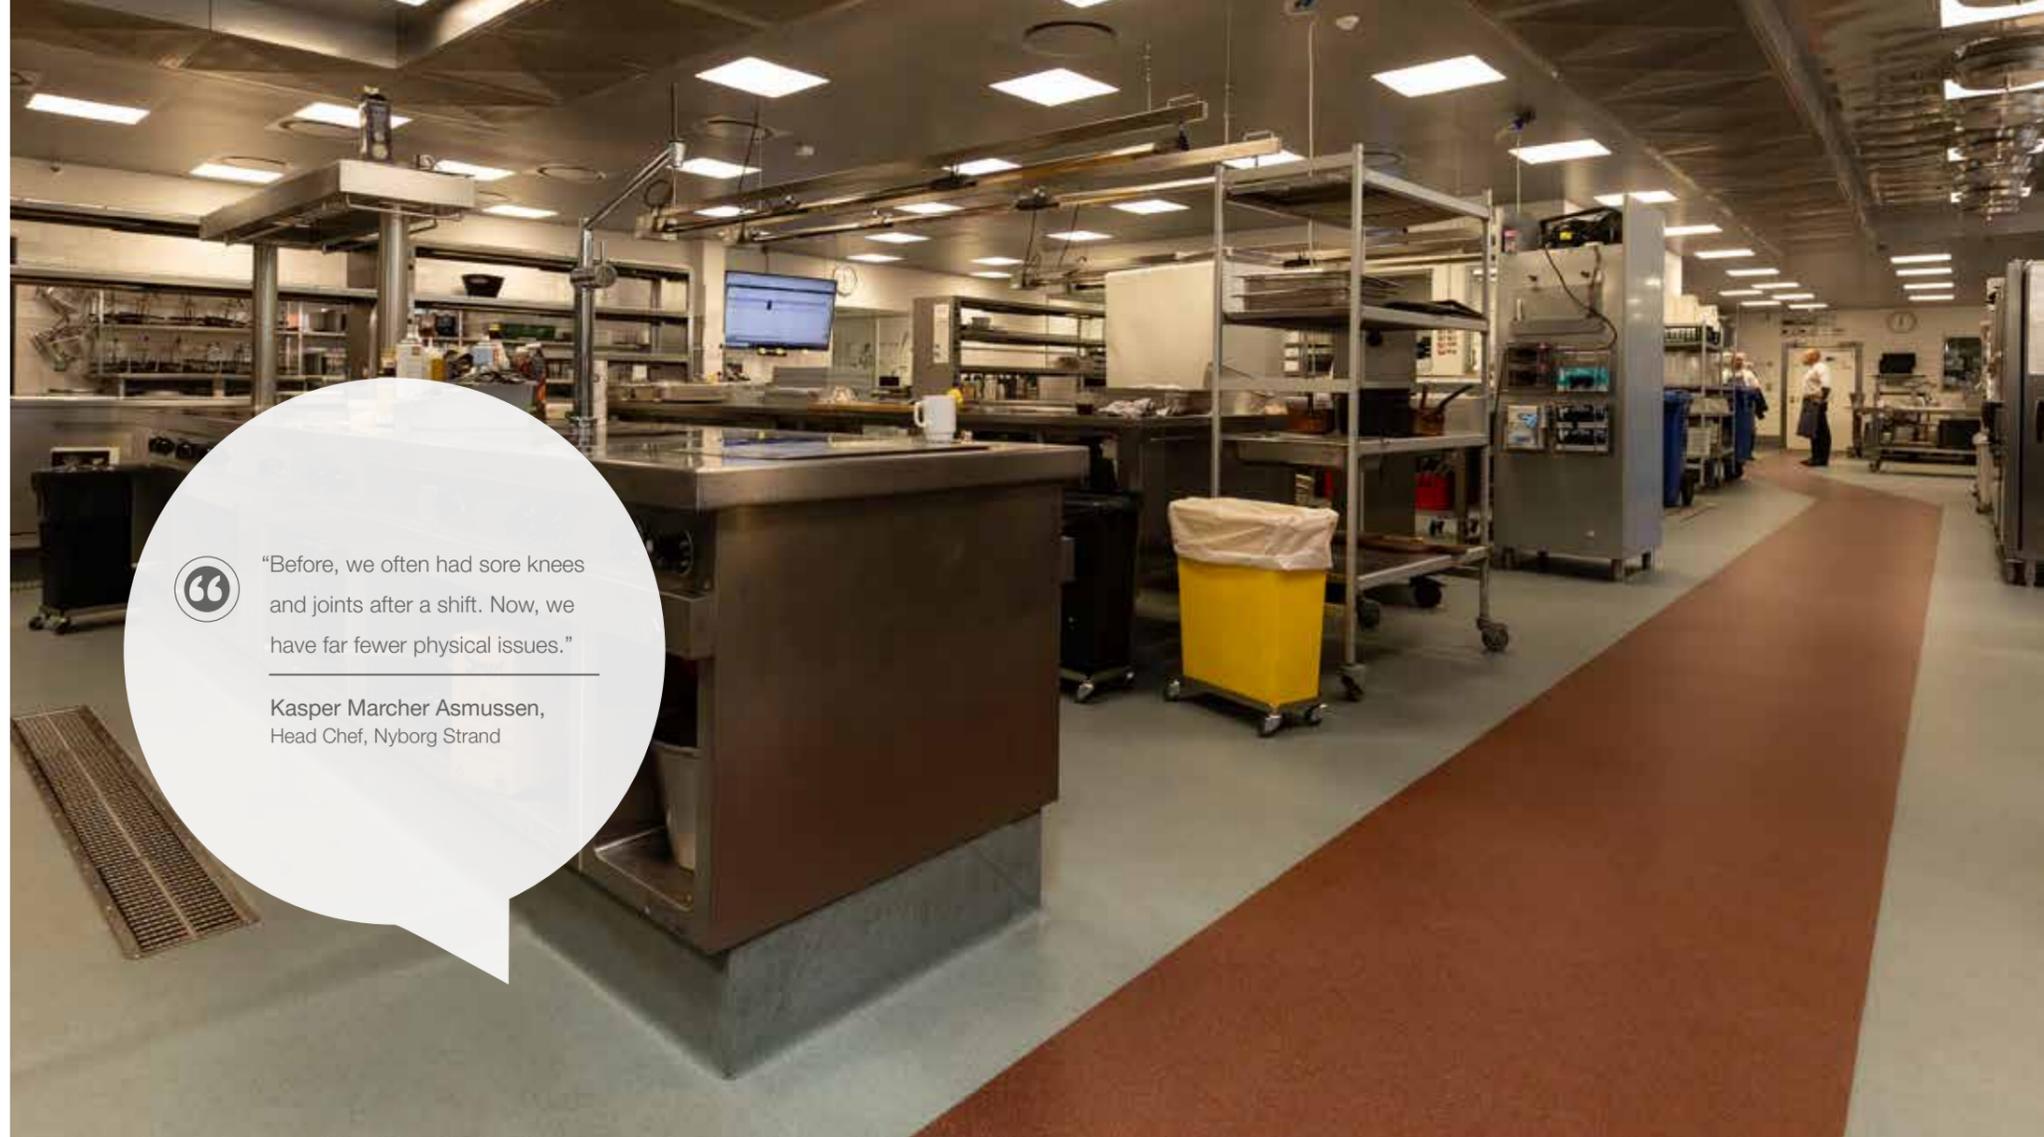

Nyborg Strand Hotel & Conference Centre is Denmark's largest conference hotel outside Copenhagen, serving up to 1,500 guests daily. The 1,200 m² central kitchen needed a durable and slip-resistant flooring solution to handle the heavy use. "We had tiles before – they were slippery, hard, and difficult to clean. Trolleys got stuck in the joints, and the dishes arrived to the guest looking messy," said Kitchen Manager Kasper Marcher Asmussen.

Approach

When building the new kitchen in 2020, the hotel chose Altro Stronghold 30 to improve safety and working conditions. The floor was divided into colour zones to support flow. A 'highway' in Russet runs through the kitchen – standing still here is not allowed. The contrast with colour Skyline on the rest of the floor helps maintain pace and reduce accidents. The matte finish of Skyline complements the kitchen's natural daylight.

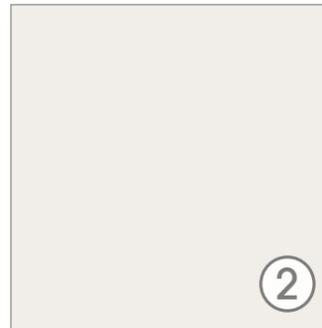

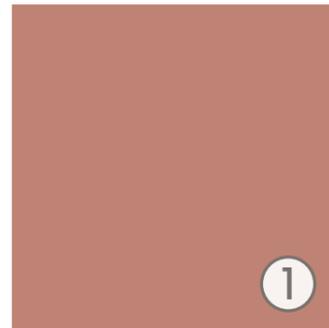

Solution

The floor has reduced slips, improved working conditions, and made kitchen operations smoother. Trolleys now roll freely, and dishes reach the guests just as intended.

"Before, we often had sore knees and joints after a shift. Now, we have far fewer physical issues."

Kasper Marcher Asmussen,
Head Chef, Nyborg Strand

Altro Stronghold 30 is a slip-resistant R12 floor designed for busy commercial kitchens. It creates a safe, hygienic, and comfortable work environment and comes in several colours for smart zoning. The floor is easy to clean and is wear-resistant even with constant moisture and heavy traffic.

Looks great with:

1. Altro Whiterock Satins™ | Clay
2. Altro Whiterock White™
3. Altro Classic™ 25 | Anvil
