Ideas to help you deliver, excite, spark, inspire, guide and narrate

Issue 02

# Welcome to d.e.s.i.g.n.

Welcome to d.e.s.i.g.n.

In this issue, we're taking a close look at education, first with a fantastic guest blog by Lesley McMillan, SBID Interior Designer, and Chair of the Education Design Council for the Society of British and International Design. Lesley takes us through her approach to designing supportive, inclusive education spaces. Second, our latest case study is Beachside Holiday Park, Cornwall. Designed to let the sunshine in, despite the weather, this inspirational project includes a focus on our LVTs and has won an Altro Design Recognition Award for Ace Flooring & Carpets and the team at Beachside.

Looking for alternatives to tiles? On page 10 we put the spotlight on Altro Tegulis<sup>™</sup>, our new tile-effect wall panels that are ideal for wet rooms, bathrooms, kitchens and retail spaces.

If you love that contradiction of a hotel lobby, enjoying the bustle while marvelling at the peace around, our Get the Look feature is for you. Our Design Manager, Luca Bellavita, combines Altro Orchestra<sup>™</sup> flooring with Altro Whiterock<sup>™</sup> wall designs to create a luxurious space that brings the outside indoors.

We have moodboard inspiration around the beauty of winter, plus enough positivity and change to keep you going until spring...

If you want to discuss any of the concepts from d.e.s.i.g.n. or get help with a project, please don't hesitate to get in touch. We offer specification and technical support, product and sector resources and a range of CPDs to help you in all you do.

Enjoy.

# Designing supportive, inclusive education spaces

Lesley McMillan

SBID Interior Designer and Chair of the Education Design Council for the Society of British and International Design.

I'd like to outline the role of an interior designer in education buildings, important considerations in designing learning spaces that support pedagogy, health, wellbeing and sustainability and design considerations that I think will become increasingly important in 'post covid' learning settings.

Studying interior architecture, over the years I have been involved in the design of a variety of spaces, including education, offices, community spaces and residential. As an interior designer I am involved in lots of different scales of projects. In large or new-build projects we work as part of a design team, informing the interior architectural layout, with involvement in the design and specification of the fixed and loose fixtures, fittings and furniture. In a refurbishment, depending on the scale, we will work as part of a design team in the above capacity, and sometimes additionally undertake statutory consents, such as listed building consent, planning applications and building warrants. We can act as the principal designer, co-ordinating

the construction design management considerations of the design team, and sometimes act as the contract administrator for the works on site.

Interior design is not just about designing 'pretty spaces', although aesthetic is a large part of an interior designer's role; it's much more complex. We are the only discipline within design that interacts with almost all other areas in the design industry, such as project managers, architects, mechanical and electrical engineers, digital experts, landscape architects, structural engineers, furniture designers, textiles and product designers, through to graphic designers.

In the context of an education building, it is about designing a space that supports pedagogy – that's the method and practice of teaching - as well as promoting health, wellbeing and sustainability. The design of the best educational spaces is a result of design collaboration between all of the stakeholders for optimum experiential and physical design - experiential being the education, and physical the space. In this capacity, interior design could be seen as acting as a 'bridge' between the experiential and the physical.

# Warm, welcoming hotel reception and lobby

Hotel reception and lobby areas can be busy with people coming and going, so this space has been created to balance that, with plenty of space to relax in and an emphasis on biophilic design elements. Biophilia is our instinct to connect with nature and, when drawn upon in design, can support psychological wellbeing among its benefits. To achieve this, the window fills an entire wall space, allowing natural light in, as well as a view of the hotel gardens outside. The use of plants inside then mirrors this – in the same way, the blue seating mirrors the sky while the white ceiling and lighting emulate clouds.

The terrazzo-effect floor features green and grey 'chips', reflecting the greenery and natural stone, bringing a sense of coordination that would probably only register subconsciously. Unlike terrazzo, this vinyl floor has 15dB sound reduction to lessen the sound of passing feet and wheels. In this relatively small space, the seating fits right into the window, allowing space to relax and the perception of sitting outside, while fitting in as much seating as possible. Whilst a lobby could be stark, real wood, copper-look wall cladding, and natural stone run up the walls, enriching the space with a warm, luxurious feel; somewhere you would be happy to meet, work, wait, or enjoy reading a book. The natural look is picked up again in the wicker planter and the marble furniture so that nothing seems out of place.

#### New - Altro Tegulis<sup>™</sup> tile-effect wall panels for beautiful, modern spaces

Altro has launched an innovative new wall panel solution designed to replace the need for costly, and potentially troublesome, ceramic tiles. Altro Tegulis draws on the tradition of Altro hygienic wall solutions to launch a collection of tile-effect wall panels, in an array of colour palettes and clever designs including on-trend chevrons, hexagons and metro tiles.

Suitable for use in bathroom or kitchen renovations, whether in private housing, retail or commercial environments, Altro Tegulis is an innovative wall system with the look and feel of tiles created with custom-etched grout lines.

Mark Johnstone, Head of Commercial at Altro commented "Altro Tegulis offers the benefits of a hygienic, grout-free installation with the appearance of ceramic tiles, but without the drawbacks of bacteria and cracking often associated with them. Altro Tegulis is quick and easy to install, and completely waterproof for wet environments using our half-lap installation method."

With numerous colour and tile-effect combinations Altro Tegulis is perfect for those looking to create a stylish, flexible look for walls. Created from 10 standard tile-effect options with multiple colour and design choices, and a 10-year guarantee, Altro Tegulis takes innovative wall design to a new level.

# Altro floors and walls bring the seaside in at Cornish holiday park

#### Issue

Beachside Holiday Park is a busy, seasonal, family business that recently celebrated its 60th anniversary. In response to customer needs, the team at Beachside Holiday Park was investing in a large refurbishment, to totally transform the main building, providing a new, spacious, cohesive reception, restaurant, bar and soft play area with an overall beachside theme. The refurbishment needed to be completed in time for an expected busy holiday season.

#### Approach

In the large reception, restaurant and bar area, flooring choice was vitally important to achieving the overall vision, with the team wanting to create a space that shouted sunny seaside, even if it was raining outside. Beachside turned to lan Williams of Ace Flooring & Carpets on the recommendation of their main contractor. "We worked closely with Ben and the team at Beachside to make sure we got the look and feel they were after," explained lan. The toilets and back of house areas also needed a refresh, providing customers and staff with hygienic and safe spaces.

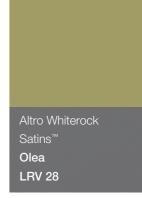

#### Solution

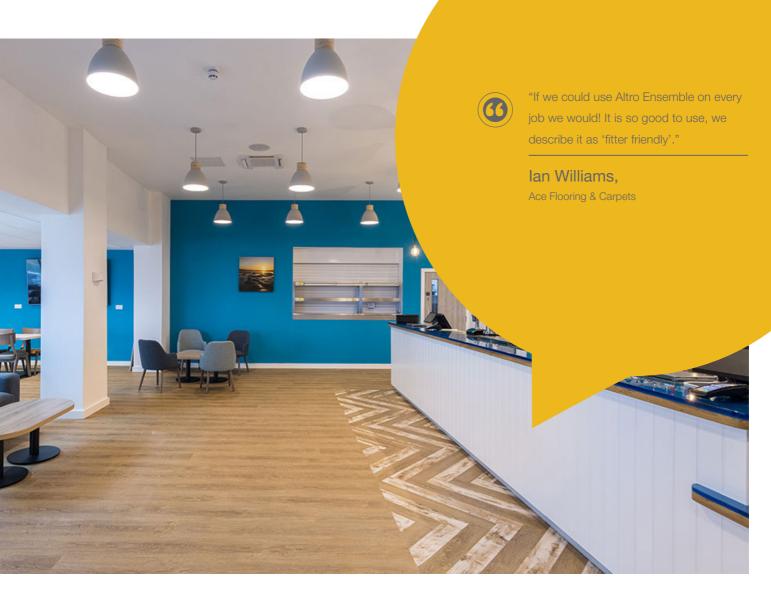

The Beachside Holiday Park needed a floor for front of house that provided longevity, durability, looked good and was easy to maintain. The team at Beachside Holiday Park and Ace Flooring worked together on this incredibly impactful space and selected two Altro wood-look. In the kitchens, Ace Flooring recommended the tried and tested combination of Altro XpressLay floor and Altro Whiterock hygienic wall cladding to deliver a robust, resilient and hygienic Hazard Analysis and Critical Control Point (HACCP) approved solution. In the toilets and throughout the back of house, the installation of sustainable Altro XpressLay™ adhesive-free safety floor reduced the downtime of these busy areas.

The design was so good, Ace Flooring & Carpets and the Beachside team were nominated for, and won, an Altro Design Recognition Award.
