Bärenwiese Veterinary Practice

Veterinary practice creates a cozy atmosphere with Altro

Berlin, Germany

Bärenwiese veterinary practice in Berlin is available for its animal patients 24 hours a day, 365 days a year. The practice has state-of-the-art treatment rooms for examinations and operations, an ultrasound room, a dedicated dental surgery space and an in-house laboratory as well as a recovery room. After updating their clinical areas, the practice discovered a need for new floors and walls for the offices, public areas and toilets.

Saskia Czempiel-Bartels, veterinarian and general manager, needed durable solutions that would also be appealing, helping to create a cozy feel in an otherwise clinical space. "The floor should create the friendly and appealing environment needed to ensure a stress-free treatment for the animals, supporting the process of recovery," stated Czempiel-Bartels. "The design of the rooms plays a major role here."

Adhesive-free Altro Cantata was chosen for the treatment rooms and the operating room – coordinating with the practice colors to create a harmonious environment. In addition to its quick installation, it is easy-to-clean and works perfectly with Altro Whiterock hygienic wall cladding.

To incorporate a splashguard into the room design, the practice management chose Altro Whiterock for the wall behind the washbasins in the treatment rooms and restrooms. It was also used for the walls of the operating rooms. Seamlessly integrated with Altro Cantata flooring, it creates a sealed, watertight system, ideal for areas where safety and hygiene are paramount. "We are very satisfied with the result because even critical parts of the installation have been expertly dealt with, such as the drains in the operating rooms, which have been seamlessly connected to the floor," Czempiel-Bartels concluded.
