Kitchens: floors and walls guide

Transforming spaces in kitchens,
front and back of house

Altro for kitchens – and beyond

With over 60 years' experience in kitchen solutions, we understand all the challenges and changes in the industry. But we don't stop there. We are the only manufacturer to provide resin and vinyl floors, hygienic walls and doorsets that can be used throughout a building, from front to back of house.

Let us help you achieve your design ambitions.

Altro are synonymous for safety and hygiene in kitchens. Yet when you cross the threshold into adjacent environments, you can continue your journey with Altro. We have robust and resilient solutions for back of house, and aesthetically vibrant floors and walls for dining areas and reception.

Our products come in up to 59 colours, including wood-look, stone and textile designs, giving you a versatile colour palette. Our specialist resin floors can handle extremes in temperature or be used for a unique front of house look. So from goods in to the front door, Altro can provide your floors, walls and doors.

We work with you from inspiration to installation and beyond providing expertise to help you with specification. This can include conducting a full risk assessment, including Pendulum testing to HSE standards and liaising with all installers to manage your project and provide onsite technical assistance.

Our products have industry-leading guarantees and we provide technical support for the lifetime of the installation. Our vinyl floors and wall sheets are recyclable through the Recofloor and Recowall recycling programmes.

From start to finish, we have you covered. It's all part of the Altro promise.

Quick turnaround

Unlike tiles, our floors and walls can be installed quickly and are integrated for a watertight transition between surfaces to prevent build-up of bacteria, mould and dirt. We also have adhesive-free floors, luxury vinyl tiles and fast-track resins for areas where downtime must be kept to a minimum.

Easy maintenance

Our products meet the durability and cleanability needs of all areas, reducing maintenance costs and keeping even front of house looking great for years to come.

Zoning

Altro floors and walls can be used for zoning, to distinguish different areas of the kitchen.

Specialist resins for kitchens

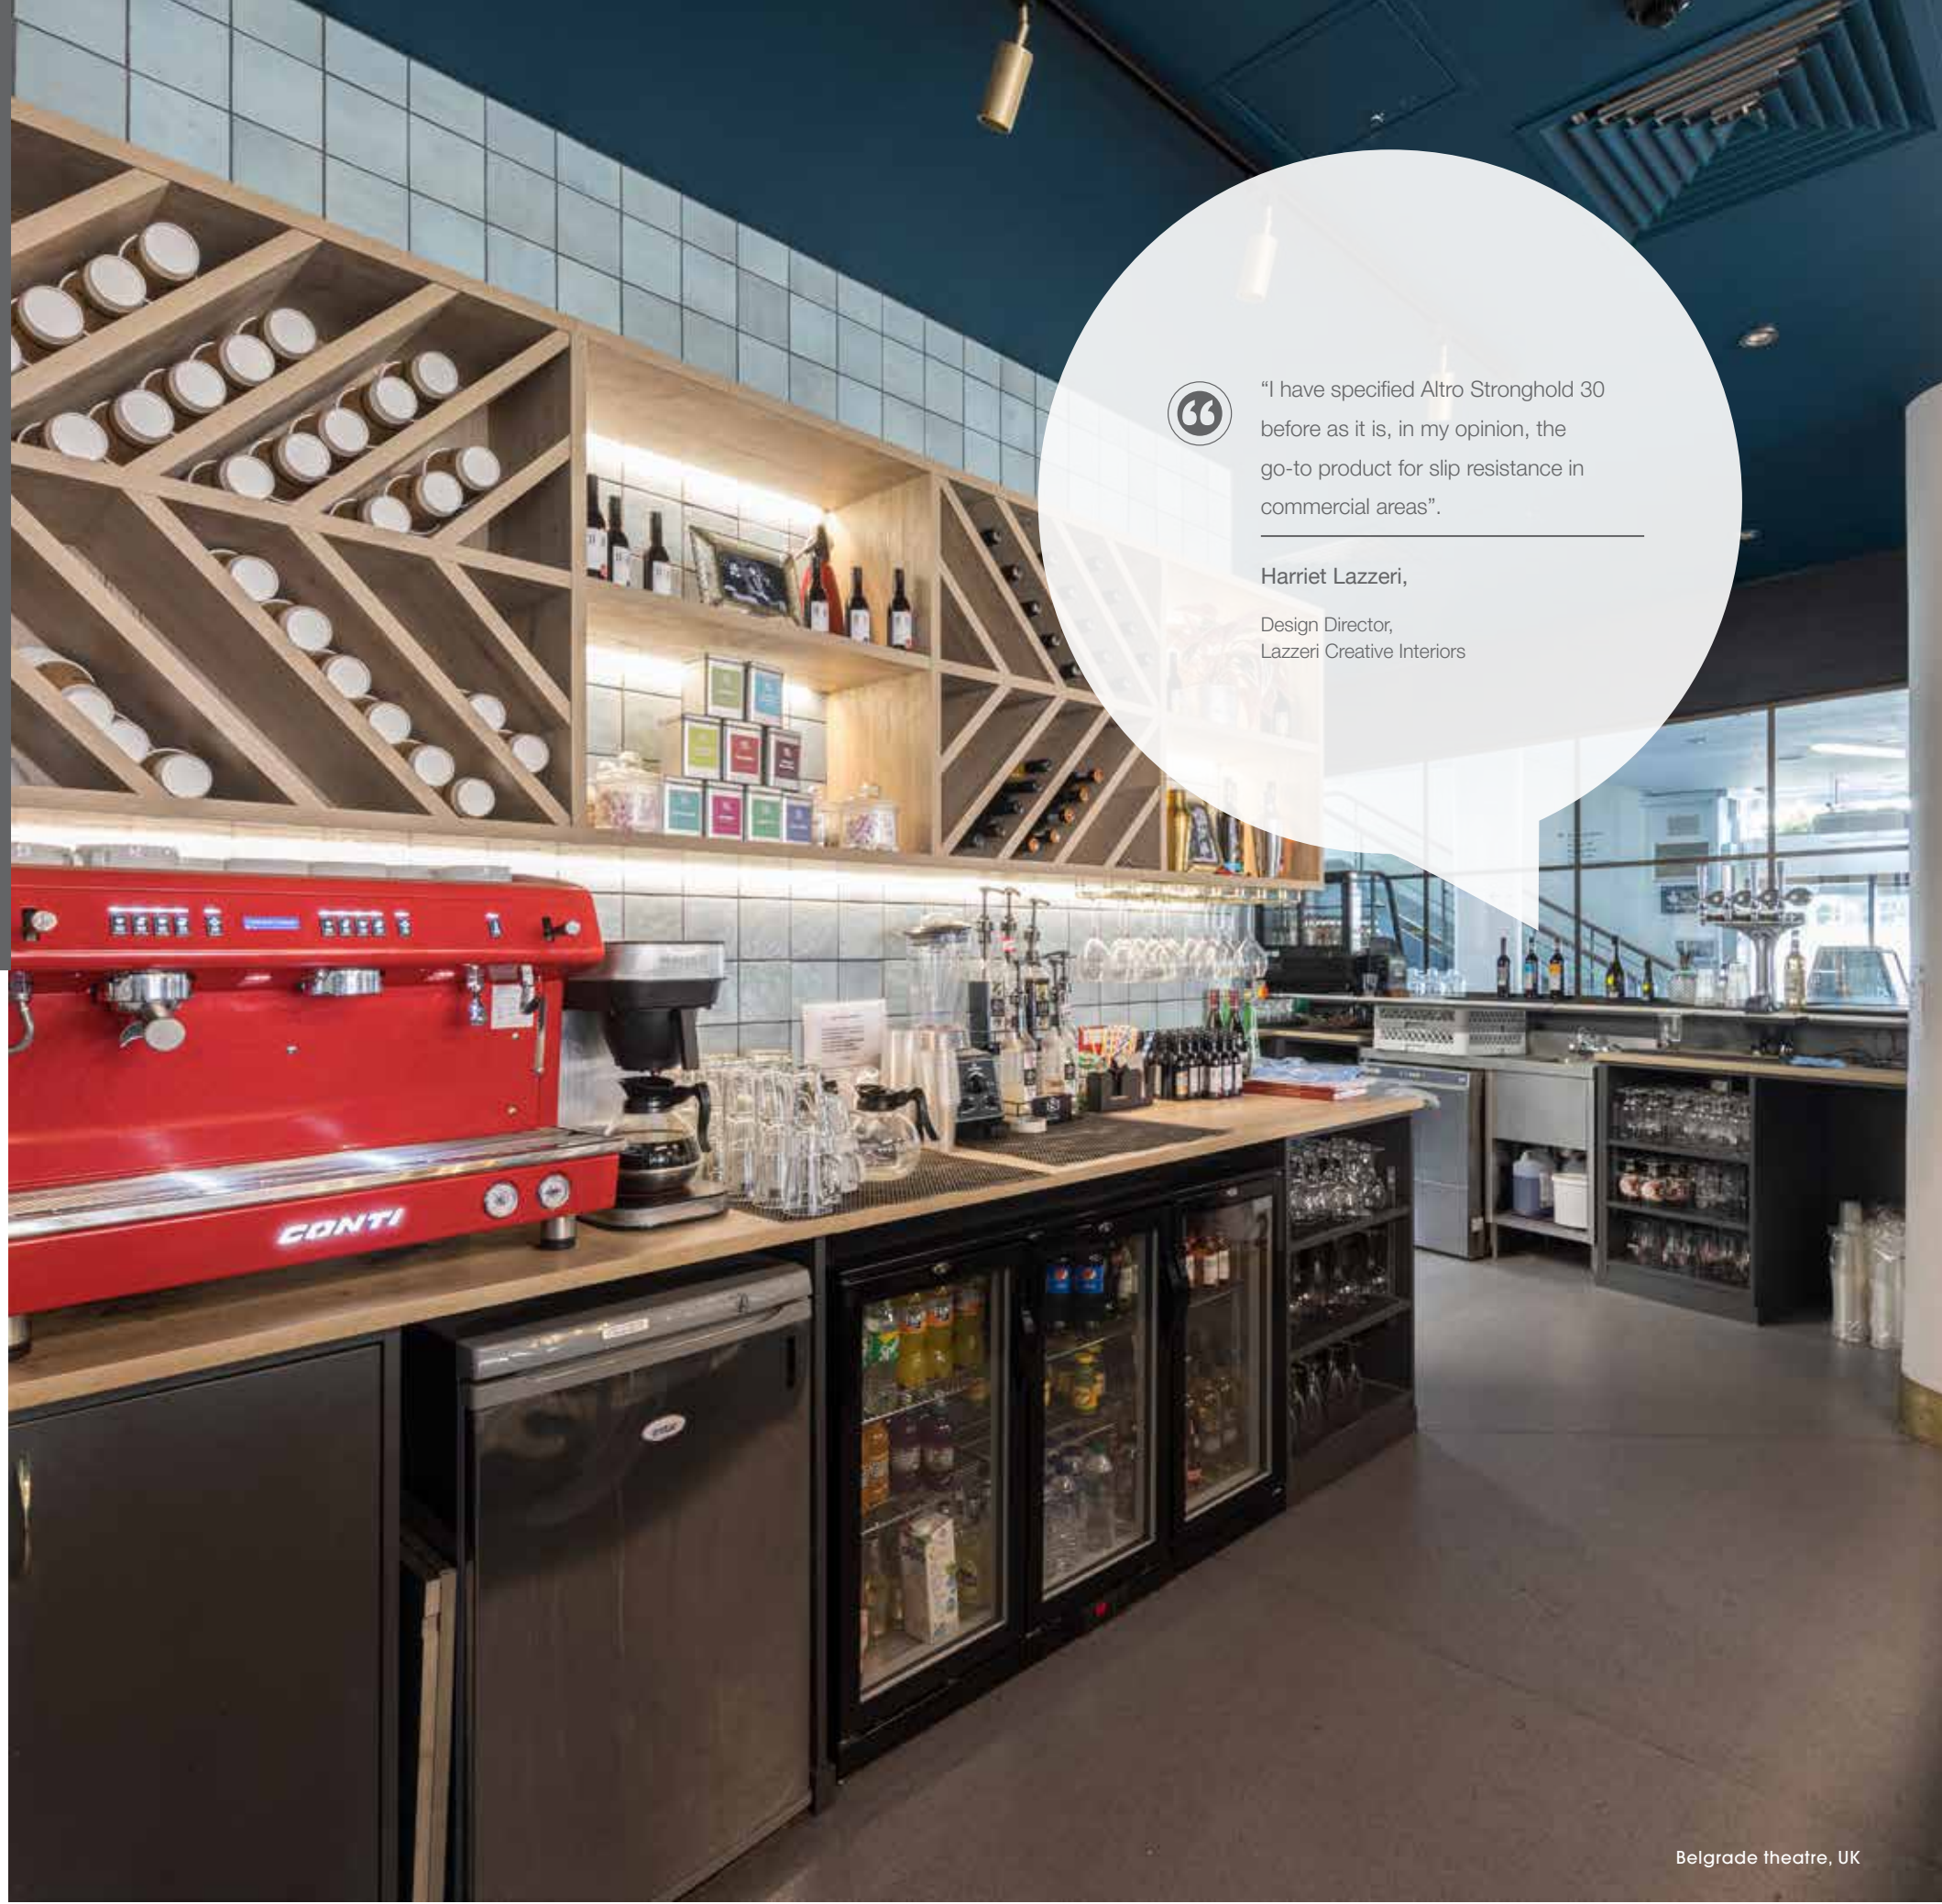

Altro Crete™ 8mm slip-resistant fast-track variant can be used in areas with extremes in temperature. It can withstand from -40°C up to +120°C, making it perfect for freezers and in areas where high temperatures and steam are the norm. It can be installed more quickly than a standard resin, and be combined with Altro Whiterock for an integrated solution from floor to ceiling.

Did you know?

Altro's floor and wall product ranges have achieved Hazard Analysis and Critical Control Points (HACCP) International certification.

Belgrade theatre, UK

Altro for safety

Our kitchen solution offers a seamless surface around joints, fixtures and fittings, leaving nowhere for bacteria to hide. Altro Stronghold™ 30, our specialist kitchen safety floor, has the highest rating for safety (PTV≥55, R12) with common contaminants such as oil, flour and fats, reducing the chance of a slip to one in a million for the lifetime of the floor.

Altro Stronghold 30 can withstand temperatures from -30°C to +60°C and has 10dB for comfort underfoot and sound reduction in busy kitchens.

Save time, money and carbon with Altro Stronghold 30 adhesive-free - weld and walk on the same day with this 100% recyclable safety floor. Kitchen downtime can be halved by choosing Altro Stronghold 30 adhesive-free and you can even overlay existing flooring, meaning no need to prep the substrate.

Altro Whiterock has a Class B s3 d0 according to EN 13501. Altro Whiterock hygienic doorsets have fire resistance up to FD60.

Our system doesn’t just protect the people who use it; it also protects the environment and those responsible for the health and safety of employees and visitors.

Altro for hygiene

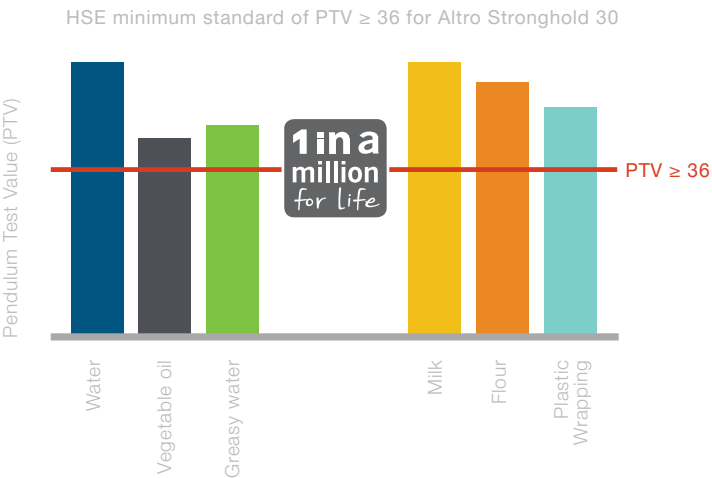

Our surfaces are so tough they can be power washed and have excellent resistance against typical cleaning chemicals. So when you have a clean kitchen, you have a safe kitchen.

Altro: industry approved

Our kitchen solutions keep you safe not only from slips, but are HACCP-approved for commercial kitchen use, providing peace of mind post-installation.

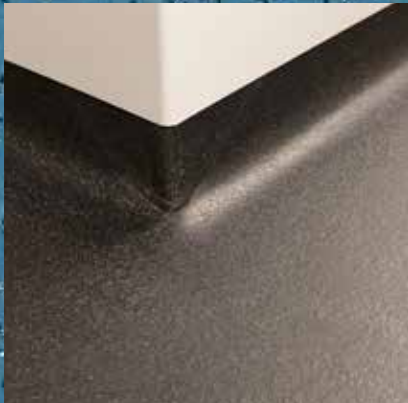

Industry-leading slip resistant values for floors with contaminants. Please ask if you have special requirements.

Resin floor withstands from -40°C up to +120°C

Wall fire classification Class B-s3 d0; doors up to FD60

Easy clean and impervious – bacteria can’t hide!

Slips and trips injuries comprise 35% of ‘major’ injuries in the food and drink industries (e.g. causing a broken arm or requiring hospitalisation). Slips injuries are more prevalent in the food and drink industries than in most other industries.
