Altro brings innovative design
to historic dental clinic

Issue

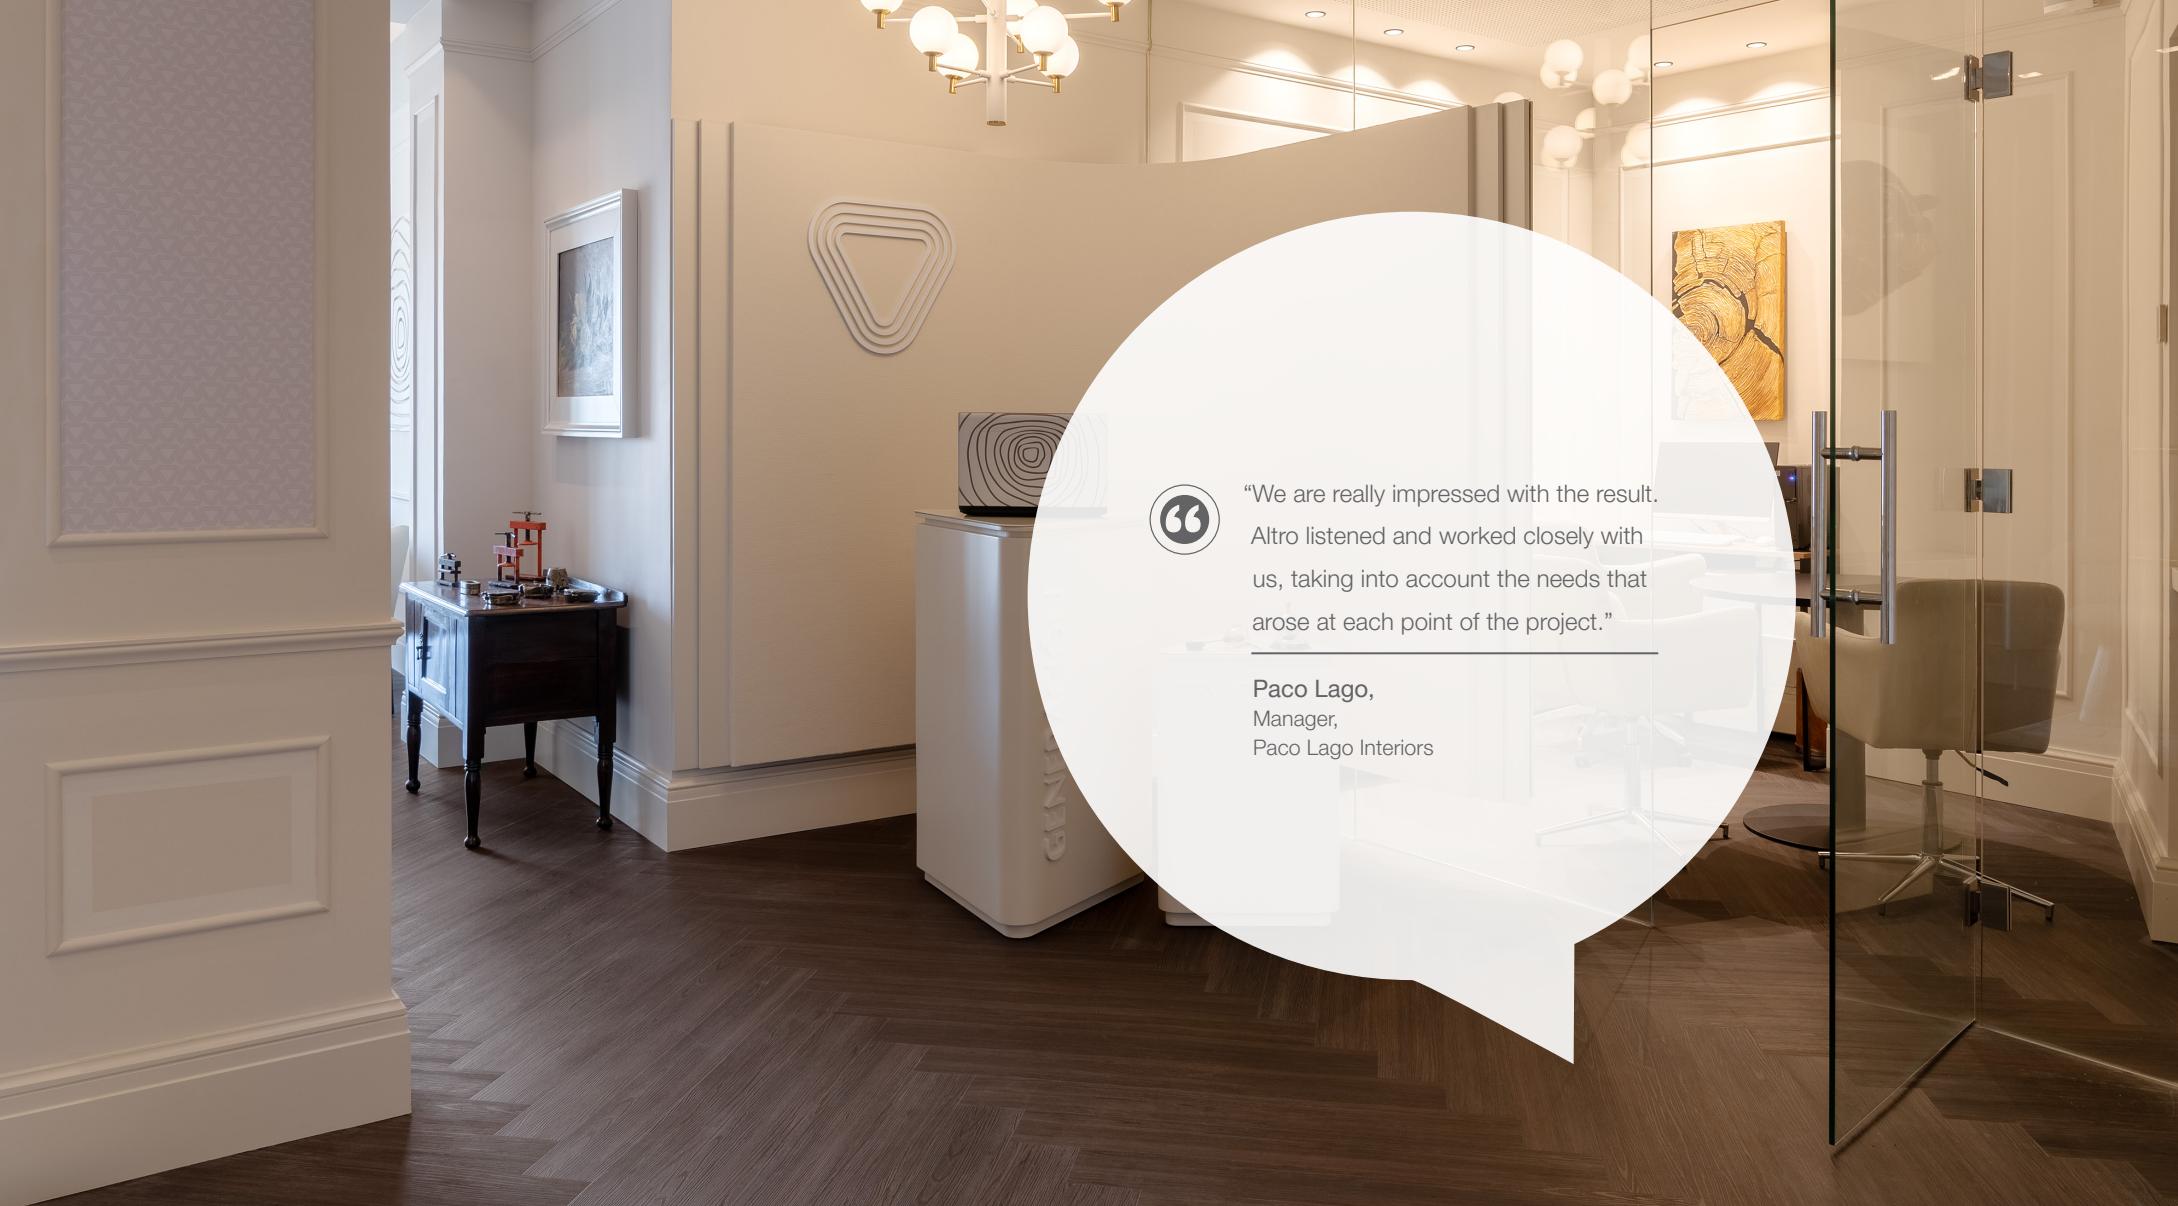

The Fernández-Baca family opened its first dental practice in 1894. Four generations of dentists in the family later, they wanted to refurbish the clinic, which is located in a historic building in Malaga. The challenge was to design and remodel the clinical space, customer service area and corridors, toilets and X-ray suite, while maintaining the historical character of the space and bringing to life the innovative concepts of dentistry.

Approach

Studio Paco Lago Interiors explored new design ideas and colour palettes, taking inspiration from the different shades of white that exist in dentistry, and in keeping with the clinic's brand identity.

Solution

Altro floors were chosen for both their aesthetics and technical performance. Altro Ensemble in wood-look regal walnut was chosen for the customer service areas and corridors to give a welcoming and homely feel. Altro Orchestra was installed in the adjacent storage and back of house areas, toilets and photographic X-ray suite where comfort underfoot and noise reduction were paramount.

"We are really impressed with the result. Altro listened and worked closely with us, taking into account the needs that arose at each point of the project."
