LEED v4

Sustainability is about so much more than just environmental issues. Sustainability encompasses both social and economic dimensions as well as environmental responsibility.

This is known as the three pillars of sustainability or 'the Triple Bottom Line.'

We recognize that the three pillars of sustainable development – social, economic and environmental – are closely interdependent.

For a product to be truly sustainable it must meet the needs of all three aspects.

Our sustainability program is a holistic approach to managing sustainability issues, considering our impact on all three aspects of sustainability and not just the environment.

EPD (Environmental Product Declaration)

An Environmental Product Declaration or EPD® provides relevant, verified, and comparable information about the environmental impact of a product. Altro supports the EPD initiative and has collaborated with the European Resilient Flooring Manufacturers' Institute to create an open and transparent Type III Industry Wide EPD for many of our flooring products.

Altro Lavencia (Plus and Click), have a Type 1 product specific EPD.

MR Credit: Building product disclosure and optimization - Environmental product declarations
Option 1, **1 point**

HPD (Health product declaration)

The HPD is a public statement of a product's content and the health hazards associated with exposure to its individual ingredients. It is intended to represent a way to gain greater transparency into the ingredients that make up building products. Altro has an HPD for all of our safety flooring products and is available by request.

MR Credit: Building product disclosure and optimization - Material ingredients
Option 1 - HPD, **1 point**

Recycled content

Altro includes post-consumer recycled content into the majority of our safety flooring products. By doing so, we divert more than 900 tons of glass from landfill each year. Altro is also the first manufacturer to recycle safety flooring in-house. By including this pre-consumer content into some of our products we divert more than 500 tons of vinyl factory waste each year.

MR Credit: Building product disclosure and optimization - Sourcing of raw materials
Option 2 Leadership Extraction Practices, **1 point**

Bio-based content

We have removed all phthalates from our safety flooring products and have replaced them with rapidly renewable, bio-based ingredients - plasticizers. The source of this ingredient comes from maize and sugar beets both responsibly grown in Europe!

MR Credit: Building product disclosure and optimization - Sourcing of raw materials
Option 2 Leadership Extraction Practices **1 point**

Low emitting materials

Many of our floor and wall products are low VOC emitting, FloorScore certified, and are in compliance with the CA 01350 standard and the CDPH Standard Method.

EQ Credit: Low emitting materials complies with CDPH Standard Method v1.1, **1 point**
