The Jesuits School

Comfort and sound reduction benefits for students

Barcelona, Spain

Founded in 1968, in the Bellvitge neighborhood, to welcome immigrants who came to work in the factories of the industrial belt, The Jesuits School consists of 1,700 students. The school has increased its campus size with additional courtyards and facilities to welcome the next generation of students.

In order to accommodate its growing student body, the school needed a floor that would meet the regulations associated with an educational environment while providing sound reduction and easy maintenance. "The fundamental objective of this refurbishment is the innovation of classrooms putting the student at the center of learning," explained Gerard Bonvehi Ventura, the school's manager.

The school ultimately selected Altro Orchestra to promote concentration with the benefits of additional comfort. This range ensures 15dB sound reduction and additional support underfoot for students and teachers. Its wide range of colors, durability and acoustic comfort made this product ideal for the school's vision.

Coordinates well with

1. Altro Whiterock
2. Altro Serenade
3. Altro Operetta
