

Slip Resistant Flooring for Emergency Vehicles

Altro Transflor Meta™ and Altro Transflor Chroma™

explore [altrotransflor.com](https://www.altrotransflor.com)

Altro Transflor Meta and Altro Transflor Chroma are designed with your passengers' safety and comfort in mind. These products' attributes make them ideally suited for use in ambulances and emergency vehicles.

Both floors offer high levels of slip resistance by incorporating aggregates of silicon carbide and aluminum oxide throughout the thickness of the floor.

Features and Benefits:

- **Occupant safety** - slip resistant even under wet conditions
- **Stain resistant** - resists staining of blood and many other chemicals
- **Easy to clean** - Altro Easyclean Original™ technology provides for ease of cleaning
- **Durable** - hard wearing and retains slip resistance and original color through out the life of the floor
- **Seamless installation** - 79 inch width allows for an easy, one sheet installation
- **Waterproof barrier** - heat welded seams provide protection from water and bacteria ingress
- **Flexible** - can be self coved and applied over a variety of angles
- **Many colors** - available in 25 standard colors in both solid and chipped designs
- **Stocked locally** - available in North America
- **Low VOCs** - breathe easier knowing these products are low VOC emitting and comply with the CA 01350 air quality standard
- **Bio-based content** - these products do not contain phthalates and contain rapidly renewable, bio-based ingredients
