Alfred Hospital

Altro provides hygienic modern interior solution

Alfred Hospital was founded in 1871, making it the oldest hospital operating on its original site in Melbourne, Australia. Also referred to as The Alfred, they've recently undergone some refurbishments to modernize the interior design of the wards. They used Altro Whiterock™ White for the main walls and corridors and created splash backs matching the ward colors in Altro Whiterock Chameleon.

Using the Altro Whiterock system, The Alfred has created a hygienic, easy to clean wall design that matches the hospital's color scheme and is aesthetically pleasing to all patients, staff and visitors.

“Using the Altro Whiterock has really enhanced the hospital interiors. Not only does it provide hygiene, durability and ease of maintenance but it also provides a high quality finish. We were able to use the Altro Whiterock colors to create splash backs and features that match the ward colors. The design really gave the hospital a modern and sleek look. We strive to enhance patients, staff and visitor areas and Altro Whiterock helps us to achieve that.” - Deborah Watters, Manager - Capital Works & Infrastructure projects, Alfred Health
