Streamline your installation

With over 60 years' experience in the global transport market, Altro have developed an in-depth understanding of the unique challenges presented by this diverse industry. With these insights and our collaboration with global bus and rail manufacturers, we've developed our pre-cut flooring service to enable original equipment manufacturers (OEMs) and refurbishment partners to save time and reduce the environmental impact of their installations.

Plan for a fast, easy installation

Simply choose your flooring and send us your bill of materials alongside any relevant technical drawings in .dxf format, and we'll do the rest. We'll use our state-of-the-art in house cutting technology to pre-cut your flooring order into handy, smaller pieces ready to unroll and install. All pieces will be clearly labelled and packed according to your specific requirements and panel locations.

Cutting edge efficiency

Altro's pre-cut flooring service for transport is designed with the needs of both manufacturers and operators in mind: save time and reduce waste on your vehicle installation, and create a safer working environment for your technicians with reduced manual handling and less risk of cutting injuries.

Selecting our pre-cutting service for your transport installation is a more efficient and less wasteful way to achieve consistent, cost effective, high-quality installations for vehicles. It couldn't be simpler.

Did you know?

It is possible to order all existing Altro transport flooring ranges and designs to be pre-cut, so you never have to compromise on performance or style.

Cut time on your installation

Save time

With our pre-cut flooring service, time spent measuring and cutting flooring – as well as the extra space needed to do so – is a thing of the past. Your flooring will be delivered in handy smaller pieces in individual rolls, for easier manual handling. Once unrolled and acclimatised, simply dry fit the pieces into place, trim if needed, then stick down, roll and weld

Save waste and the planet

Play your part in reducing waste in your vehicle assembly: receive your flooring requirements pre-cut and ready for installation. We set up our in-house cutting technology so that offcuts and waste are minimal – and, in the UK, even those go into our in-house recycling system to save them from landfill. We are proud that Altro has sent zero waste to landfill since 2014.

Did you know?

We are proud to have achieved 0% waste to landfill at our UK manufacturing plant

Endless design possibilities

Our in-house cutting technology has the capability to accurately realise intricate shapes, logos and designs with all our transport floors. Whether you're looking to cut your company logo, instructional and guidance text, or even your service city's skyline for a touch of visual flair, speak to us to find out how we can make your design dreams a reality.

Go all the way

Altro offer a range of services to help streamline your installation which can be used separately, or all together as an efficient system. Eliminate harmful VOC emissions, adhesive application and curing time, as well as 60% adhesive weight per square metre with our self-adhesive service. Speak to us today about combining our services for installation success.

Installation guidance

1. Ensure the subfloor is clean, dry, and free from dust and debris.
2. Unroll all of your pre-cut pieces and check that you have all the pieces you need
3. Allow the pieces to “relax” and, if needed, reach optimum installation temperature
4. Dry fit the pieces into the vehicle and trim if needed
5. Remove the pieces and apply your adhesive, leaving the appropriate “flashing off” time
6. Lay your pre-cut pieces into the adhesive and roll with a three section floor roller
7. Allow recommended adhesive curing time, and then weld the seams

Why choose Altro's pre-cut flooring service?

- To reduce vehicle downtime and the impact it has on service delivery
- To increase operational efficiency, but not at the price of performance
- To remove risks associated with the skilled process of installation
- To achieve a consistent, high-quality finish across your entire fleet
- To reduce accidents and injuries around cutting and manual handling

Available for:

- Altro Transflor Meta™
- Altro Transflor Chroma™ EV
- Altro Transflor Figura™ EV
- Altro Transflor Wood™
- Altro Transflor Artis™
- Altro Transflor Tungsten™
- Altro Transflor Motus™

Tip

Altro's kit cutting service can be combined with our self-adhesive service to remove adhesive application and curing time, as well as significantly reduce harmful VOC emissions.
