Women's Clinic, Germany

Altro Ensemble supports
cosy atmosphere of day clinic

1. Altro Ensemble™

2. Altro Operetta™

Women's Clinic, Germany

Altro Ensemble supports cosy ambience of day clinic

Issue

In April 2018, one of the largest gynaecological day clinics in Germany opened at its new location in Hamburg. A total of 15 specialist doctors now have access to new clinic rooms with over 2,500 m² of space – almost 70% more than at the previous location.

The doctors are delighted with the six new, modern operating theatres and as the centrepiece of the new clinic, they offer the optimal environment for the safety of patients.

Approach

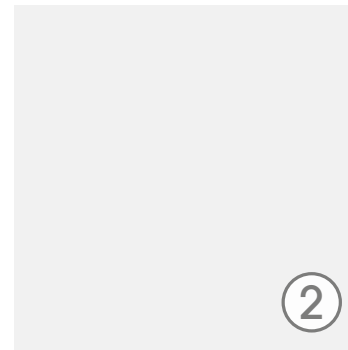

The architecture and planning office K-Line MedPlan from Kiel chose Altro Ensemble modular flooring for the interior design with a durable and scratch-resistant surface.

With its appealing design, the flooring supports the cosy ambience in the day clinic and its impact sound reduction of up to 15dB ensures a quiet environment in the clinic and the rooms below it.

A total of 1,360 m² of flooring was installed in the patient rooms, sanitary areas and treatment rooms as well as in public areas. In the operating floor and in the preoperative areas, a total of 400 m² of Altro Operetta was installed. The flooring has the same high quality as Altro Ensemble.

Solution

With up to 15dB impact sound reduction, Altro Ensemble is ideal for use in high traffic areas where aesthetics are important. Altro Operetta is perfect for busy traffic areas in public areas with medium to high traffic and is easy to clean.

Looks good with:

1. Altro Whiterock™ wall designs
2. Altro Whiterock Satins™
3. Altro Orchestra™

Altro Operetta is a robust floor perfect for medium to high traffic areas. It is easy to clean and maintain. It has attractive, natural and contemporary colours and finishes to fit in your interior design scheme.

Award-winning Altro Ensemble is a modular flooring system that gives complete design freedom to create stunning floors for interior spaces. From colour blocking to geometric patterns, the possibilities are as endless as your imagination.

With 15dB impact sound reduction and added comfort underfoot, it is perfect for front of house areas in hotels including foyers and reception areas, restaurant and café dining areas, retail, offices and student accommodation – any environment where design is key.
