Self-covered with cove former to Altro Whiterock semi-rigid hygienic PVCu sheet

November 2016

For locations where sheet vinyl flooring needs to achieve a watertight hygienic seal with Altro Whiterock semi-rigid hygienic PVCu sheet. The Altro flooring should be covered over a CF38R/CF20R radius cove former, fixed at the junction of the wall and floor, up to a minimum height of 100mm and finished into the Altro Whiterock Transition

Strip A832, fixed by the appropriate wall cladding installer, the flooring should be sealed with a silicone sealant, into the transition strip. The cove former and Altro flooring used in this section must be adhered with a suitable contact adhesive. All mitres and joints within the coving must be hot welded.
