

Updated stocking policy for color-matched mastics and sealants

Beginning in early 2025, Altro Americas will no longer stock color-matching mastics and sealants for every floor and wall color in our portfolio. We have analyzed our sales data and curated an inventory that supports the most popular colors, ensuring that the majority of products still have a matching option available. **The chart below outlines which colors currently have a matching mastic or sealant.**

If a direct color match is not available, we recommend the following options:

- Use clear (Mastic A1M200 and Sealant A803)
- Select an in-stock color that closely matches
- If multiple materials are being installed in the same area, choose the color that has an in-stock match
- Place a special order for a custom color match (minimum order of 100 units, lead time of 8–12 weeks)
