Healthpoint Wellness Center

Altro Aquarius™ and Altro Whiterock™ installed at recently opened wellness center

HealthPoint Center for Health and Fitness is a 40,000 square foot hospital-sponsored facility located in Pawley's Island, South Carolina. The center is a health club and fitness gym, but is most recognized for providing a unique cardiac conditioning program and a specialized cancer rehabilitation program. HealthPoint is focused on improving their member's quality of life through education and exercise.

With HealthPoint's strong focus on the success and health of its members, the recent installation needed to uphold strict hygienic standards. Curtis Group, an architect out of Pawley's Island, was looking for a solution for the shower area walls.

Needing something that could go over the existing block walls, Altro Whiterock offered a simple installation requiring less prep work than other options. Using a full coverage adhesive, Altro Whiterock can go over many substrates, including ceramic tile and

block work. Curtis Group installed two hundred Altro Whiterock wall panels in the shower areas.

To further the hygienic properties, Curtis Group wanted to create a seamless solution and looked again to Altro for their flooring needs. The architects were excited by the newly released Altro Aquarius, ideal for locker room areas where there is both shoe and barefoot traffic. Curtis Group installed 250 yards of Blue Penguin in the men's locker rooms and 250 yards of Salamander in the women's areas.

HealthPoint's strong ties to the healthcare community called for products that would help the center continue to provide a healthy environment for their members. The Altro Aquarius and Altro Whiterock floor and wall system offered a hygienic, seamless solution along with design elements that created a fresh look.
