Sushi Alley Izakaya restrooms

Altro Whiterock™ Chameleon makes a bold and confident statement wherever it is installed

Sushi Alley Izakaya, located in Tulsa, Oklahoma, is a Japanese drinking establishment that also serves food to accompany drinks. Izakaya's are often referred to as "tapas" or a "Japanese pub". Sushi Alley re-interprets the Izakaya by offering organic and original dishes influenced by Japan and Korea. It is small, sleek, efficient, and focused on appearances.

Sushi Alley was in need of a renovation to the walls in their men's and women's restrooms. The owners were looking for a product that would complement the sleek flow of the main dining room while still providing a high level of hygienic properties.

They chose to install Altro Whiterock Chameleon Slip Stream in the men's restroom and Altro Whiterock Chameleon Shocking Pink in the women's restroom. Altro Whiterock Chameleon was chosen because it is a durable, hygienic product that also brings a sense of design and appeal to the restrooms.

Altro Whiterock Chameleon makes a bold and confident design statement wherever it is installed. The broad palette lets you create a variety of effects to suit the mood of the application, using it either as a primary focus or as an accent to an existing wall.

Altro Whiterock Chameleon is suitable for feature walls in shops and bars, as well as areas where you want to enjoy the performance benefits of Altro Whiterock. It is highly durable and provides a water-tight, seamless, wipe clean, smooth surface.
