

Need something more than our standard Altro Lavencia range?

Thanks to local manufacturing innovations, we are now able to offer Altro Lavencia in custom options! Four pre-built specifications with varying choices in thickness, wear layer and finish are available if you are looking to use a film print from our standard range.

But, if our standard film prints and pre-built custom ranges do not suit your needs, please let us know! With additional consultation, we may be able to build an LVT program that fits your unique needs.

With a quick 4 - 6 week manufacturing lead time (on customs) you'll find that Altro Lavencia is very easy to source! Of course, minimum order requirements must be met for custom orders, but we've kept the amount low to the benefit of our customers.

We hope to meet all of your LVT flooring needs and become your supplier of choice.
