**Innovative technology firm
chooses Altro for its new HQ**

Challenge

Triton Systems Inc. are a global product venturing and investment company, developing innovative ideas from concept stages to commercial fruition. In order to accommodate their rapid growth and expand production capabilities, Triton needed to relocate its facilities and headquarters to a newly renovated space. The remodelled site includes a host of upgraded amenities, such as new laboratories and development centres, to enable a full spectrum of in-house operations ranging from chemistry and biology to machining, testing and virtual reality.

Approach

Local design firm Fishbrook Design Studio, collaborated with Triton to create the ideal interior for their new site. In the laboratory areas, the studio specified Altro Walkway 20 safety flooring to promote employee safety and achieve the desired aesthetic.

Solution

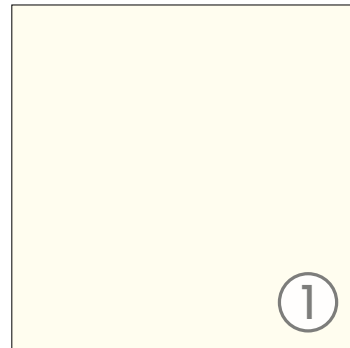

“We were looking for attractive flooring solutions that offered safe environments, cleanliness, low maintenance and durability,” explained Kristin Naumann, Director of Design, Fishbrook Design Studio. “For my renovation projects, Altro products offer a great looking, durable way to upgrade high-traffic areas such as common areas and workspaces.”

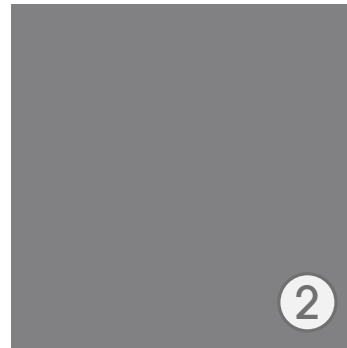

“Altro’s quality standards and ability to withstand moisture, high traffic and heavy use is why I feel confident specifying them for demanding, high-performance interiors.”

Kristin Naumann,

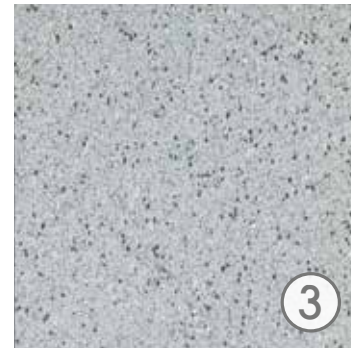

Director of Design,
Fishbrook Design Studio

Looks great with:

1. Altro Whiterock White™
2. Altro Whiterock Satins™
3. Altro XpressLay™

Altro Walkway 20 is our incredibly popular, durable 2mm safety floor that prevents both slips and wear throughout the product’s life. The range offers 30 colours – both bright and muted as well as decorative designs with, for example, coloured flakes, which gives you greater design flexibility.
