A resilient natural mineral-inspired design flooring for bus

altro.com

Altro Transflor Artis

Typical applications:

City buses, coaches,
autonomous vehicles, light
commuter buses, public service
vehicles, shuttle buses

Consider the Grand Canyon, Uluru, or the Giants' Causeway: awe-inspiring landmarks, as elegant and resilient now as they were millennia before. Bring the same iconic design to your vehicle interiors with Altro Transflor Artis.

Distinctive natural mineral inspired designs add elegant resilience to bring the soothing steadfastness of natural materials to your interior design. Altro Transflor Artis doesn't just bring exceptional looks, but also offers numerous performance benefits to take your bus interior to the next level.

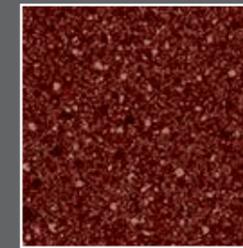

Inspired by colours and textures of the natural world, Altro Transflor Artis gives you the opportunity to bring the outside in with your bus design. Use the twelve standard colours of Altro Transflor Artis to echo the outside landscape around your bus service, or bring a biophilic touch to an inner city service.

If you have a particular design in mind – speak to us! Altro Transflor Artis is available for our custom colour service.*

Natural resilience

The construction of Altro Transflor Artis is engineered to be durable and resilient, with superior scuff, scratch and stain resistance from top to bottom.

Altro Transflor Artis is treated with a permanent durable PUR coating to give long-lasting protection against scuffs and scratches, give the floor superior stain resistance, and facilitate easier cleaning. This tough wear layer passes key abrasion tests, meaning it can stand up to the heavy wear of the daily commute, while still providing robust R10 slip resistance.

Comfort underfoot

Within the 2.2mm construction of Altro Transflor Artis is a fleece backing which gives the floor a softer feeling underfoot, so even if your passengers can't find a seat on a busy service, they'll still have a comfortable ride.

Did you know?

You can use our custom colour service to create your own Altro Transflor Artis colours.

Easy cleaning

Now, more than ever, being able to provide a clean and hygienic travel environment is of paramount importance. Altro Transflor Artis is engineered to ensure that cleaning and maintenance is as easy as possible.

Easy maintenance

A clean travel environment not only makes for a positive passenger experience but also means that the slip resistance of your chosen floor is not compromised. The resilient construction of Altro Transflor Artis includes a PUR coating which minimises the likelihood that dirt will “stick” and makes it easier to lift and clean dirt away if it does. This transparent layer also adds stain resistance to ensure that the design of your chosen floor is protected.

No time for stains

Our in-house testing revealed that Altro Transflor Artis outperforms competitor products when removing a wide range of stains including permanent marker pen, coffee, and mud.

Choose Altro Transflor Artis for lasting good looks.

For best results, Altro recommend that floors are cleaned daily with a regular clean, with a more thorough deep clean at least once a month, or as needed to combat heavy soiling.

Regular and deep cleaning

Type of clean	AltroClean 44+ dilution ratio	Settling time
Regular cleaning	1:140	5 minutes
Deep cleaning	1:35	5 minutes

For regular daily cleaning, Altro recommends a dilution rate of 1:140.
For a monthly deep clean, Altro recommends a dilution rate of 1:35

Did you know?

Altro Transflor Artis is stringently tested to ensure superior stain resistance.

Streamline your installation

Why not streamline your installation using our value added services?

Altro pre-cut flooring service

Save time and waste by utilising Altro's pre-cut flooring service. Simply send us a floorplan of your intended installation area and receive your order pre-cut in handy, smaller, labelled rolls. From there, simply allow the rolls to relax, and adhere, roll and weld as normal. With no measuring or cutting needed, our pre-cut flooring service adds efficiency to save valuable time on installation.

Altro self-adhesive service

Entirely eliminate adhesive application and curing time, save 60% adhesive weight per square metre, and work with almost zero harmful

VOC emissions with our self-adhesive service. With self-adhesive transport floors, simply peel, stick, roll, weld and walk – after the flooring is adhered to the subfloor, there is no curing time and the rest of the installation can continue without delay. Choose Altro's self-adhesive service for enhanced

Pushed for time?

Then why not go for the ultimate in efficiency and combine both the pre-cut flooring and self-adhesive services? Leave most of the hard work to us by ordering your flooring self-adhesive and pre-cut, and save yourself time, weight and waste.

Did you know?

We can carry out our value added services in-house, which means minimal lead times on orders.

Eliminate adhesive application and curing time as well as measuring and cutting time

Self-adhesive transport flooring can be welded and walked on immediately

Altro's self-adhesive service works with all well-prepared common subfloors
