

altro

Pound for pound

Altro performs best under pressure.

Durable construction

Altro Symphonia sheet vinyl flooring is constructed with the most durable materials available and offers superior value for the price. It requires no waxing or stripping and the stain resistant technology reduces the need for expensive cleaning procedures.

Despite its smooth, easy to clean surface, Altro Symphonia offers an impressive level of slip resistance making it a great choice for areas where safety is a concern.

Indentation resistance

Compared to VCT and generic sheet vinyl products, Altro Symphonia is significantly more durable. Pound for pound, Altro Symphonia proves to be a tremendous value over other choices.

We've tested Altro Symphonia to the industry standard ASTM F970 Static Load Limit Indentation Test, which measures a product's resistance and resiliency against heavy point loads. The combination of high quality vinyl content and durable ingredients allows Altro Symphonia to exceed 2,000 psi, nearly 3x the limit of generic sheet vinyl and 8x that of standard VCT.
